Note: The above-mentioned duration represents only the actual testing time and does not include time for check-in process, instructions from test administrators etc.

Ei ASSET Talent Search

Ei ASSET Talent Search (Ei ATS) is a talent identification assessment that helps students discover their hidden academic potential. Students compete with their high-performing peers and get an insight into where they stand among them, and their readiness for greater academic challenges.

Test eligibility

- ✓ ASSET Percentile - 85 & above
- ✓ Grades - 4,5,6,7 & 8 (as on Nov 2023)

Discover students' abilities with Ei ASSET Talent Search and help them identify their hidden academic potential. Students who score in the 85th percentile in the Ei ASSET test are invited to the test. It is an advanced test designed to recognise the level of advancement of student's abilities and identify the educational enrichment that matches their strengths and potential. The test is designed for students from grades 4 to 8.

Why Ei ASSET Talent Search?

More often than not, academically talented students perform exceptionally well on class-level tests. However, these tests do not challenge them sufficiently enough to gauge/uncover their true academic potential. These tests measure knowledge of concepts considered appropriate for a student's grade level and provide a comparison between a given student or school and national norm groups.

However, such tests do not provide specific information about the academic accomplishments of students who perform well. While they answer most of the questions correctly, it is indicated that the student knows the grade-level concepts that comprise the test. However, it cannot indicate the learning level of the students who are beyond their grades.

The Ei ATS Test addresses this problem by accurately discerning a student's academic talent. The test helps students gauge the extent of their capabilities and understand the kind of challenging academic work they should undertake to realise their true potential.

For many academically gifted students, taking the test is the first time they begin to understand and appreciate the full extent of their talent.

Test Specifics

The Ei ATS test is an advanced test that challenges students to apply their learning and to think by answering thought-provoking questions, which are not usually asked in standard tests. The expected level of thinking is 2 grades above the student's current grade level.

The Ei ATS test comprises:

- ✓ Multiple choice questions for easy answering
- ✓ No negative marking

No Preparation Test

Students are encouraged to appear for the Ei ATS Test without prior preparation. This is because the talent search is analytical in nature and preparing for the test would be counter-productive. The test does not have any pass/fail components.

However, students can familiarise themselves with the test content by registering for ASSET Question-A-Day (AQAD). AQAD is an online offering that includes a set of thought-provoking questions that test students' knowledge of concepts on a daily basis. Students can register for AQAD by visiting: www.aqad.in This service is free of charge.

Benefits of taking Ei ATS

Above-level testing:

This type of testing experience provides insight into a student's academic abilities, builds test-taking skills, and provides insight into how a student's talents compare to others in their age group. It can give students information early on areas they might want to further develop and gives them a preview of the test-taking process.

Early Identification of talent:

Early identification is critical to address the scholastic needs of students so that parents can provide a challenging and engaging learning environment for their kids.

Recognition & Awards:

Recognition of accomplishments includes a certificate of merit as well as school notification of participation and medals for the toppers who are in the top 15% of students. The top scores are awarded as ASSET gold & silver Scholars.

Score Summary:

The participants get percentile scores for English, Maths, and Science subjects along with scaled scores.

Access to Talent Nurturing Programmes:

Opportunity to become a member of the Gifted India network where students and their parents can attend different forums

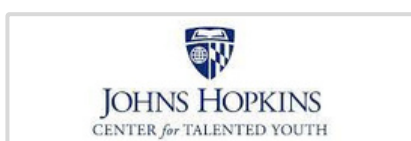

visit: <https://www.giftedindia.org/>

Opens up opportunities to enroll in India's leading Summer residential camp for gifted students organized by GenWise.

visit: <https://www.genwise.in/>

85-89	Ei ATS Bronze Scholar	Y	Ei ATS Bronze Scholar Certificate
75-84	Ei ATS Commendable Scholar	N	Ei ATS Commendable Scholar Certificate
Below 74	Ei ATS Scholar	N	Scholar Certificate

Prizes for Toppers

Overall top performing three students will get the following prizes:

Hear from the Ei ATS Scholars

“

“It is a way for us to see our potential and see where we stand among so many other students and test our knowledge that we have learnt through multiple years.”

Lasya Mohan Varma | ATS Gold Scholar
Inventure Academy, Bangalore

”

The ATS test really opened up quite literally the whole world filled with opportunities for me. It gave me access to opportunities to go to Dubai and US for programs like Northwest and Purdue and all across India as well.

Aaditya C Bontra | ATS Gold Scholar
Navrachana International School, Vadodara

“

"The ASSET talent search exam is different from others because it's an application-based exam and tests how much we can apply our knowledge on real-life problems unlike normal exams which are theoretical".

Aarna Malhotra | ATS Gold Scholar
The Shriram Millennium School, Noida

”

It was a blessing to be invited to this course because I met so many kids here with similar academic pursuits and aims. I got to learn from the top people in their fields.

Soha Haldikar | ATS Bronze Scholar
Vibgyor High School, Kolhapur

Ei's work is reviewed and recognised globally

Helping children everywhere learn with understanding

Founded in 2001, Educational Initiatives (Ei), is a global leader in assessment research and educational technology, that helps to improve the quality of education in schools for students and for government systems at scale.

Our vision is to create a world where children everywhere learn with understanding. Our goal is to reach a multitude of children across different strata of society, irrespective of the kind of education they receive today or the curriculum they follow.

We specialize in pedagogical research, assessments and personalized learning tools, to help measure learning outcomes, create solutions to remediate learning gaps and build systemic capacity within governments and organizations.

We impact a wide spectrum of schools, including state-run government schools, international schools, private schools, after-school learning centres and low-fee affordable private schools with different curriculum standards and languages. We work with governments, multi-laterals, foundations, innovative non-profit organizations and schools globally to provide impactful research-based assessment and learning solutions.

What makes Ei different

At Ei, we work with a bias to action and value people who see a problem and immediately think about how to solve it. We focus on outcomes, allowing team members to be creative to achieve their goals as long as they aspire to the degree

Our Vision

Creating a world where children everywhere learn with understanding

Our Mission

Ei leverages the twin levers of cutting-edge educational research and a technology-based solutions approach to revolutionise how children in the K-12 educational space learn.

We reach a multitude of children across different strata of society, irrespective of the kind of education they are receiving or the curriculum they are following.
